

Cosmic Hopper

Tap the screen to jump. Match the areas with the same color as the ball. If you touch the wrong color the game is over. As it progresses the game becomes harder and harder. Collect stars and use them to buy new items in the shop menu.

How to start this project?

Open the “Game” scene from the “Scene” folder and whole game will be ready and set.

Scripts

If you need to edit/change some code here is what you need to know about scripts:

- Ads.cs – Used to show the AdMob interstitial and banner ads
- BorderColorsAnimation - This script is used to create a simple animation on top and bottom borders
- ButtonsPopUpAnimation - This script is used to create a simple pop up animation
- CameraFollow.cs - This script is attached to the camera and it is used to follow the player game object
- CheckTheColors - This script is used to check if the ball hit the right color
- DestroyParticle - This script will destroy particle game object after 1 second
- DestroyTheAreaObstacle - This script will destroy the are obstacle game object after 5 seconds
- GameOver.cs - Game over logic when ball hits the border

- `Menus.cs` - This script is attached to the "GameManager" game object and it is used for navigation through the different menus
- `MenuTransitionAnimation.cs` - Simple fade in - fade out animation when player navigates through the different menus
- `ObstacleColorGenerator.cs` - Used to randomly generate colors on the game areas
- `PlayerColor.cs` - Used to randomly generate colors on the ball game object
- `PlayerMovement.cs` – Player movement logic
- `PlayerSprite.cs` - This script will change the sprite of the player game object to sprite that player has chosen in the shop menu
- `SelectItem.cs` - Used inside the shop menu for the item selection logic
- `SpawnAStar.cs` - Used to randomly spawn a star
- `TapToStart.cs` - Used to start the game when player taps the screen
- `TutorialBallImage.cs` - Change the ball image to match the one that is selected in the shop menu
- `UnlockItem.cs` - Attached on each item in the shop menu and it is used to check whether the item is unlocked
- `Vars.cs` - Static variables used throughout the game
